CONTENTS OF SOME PREVIOUS VOLUMES

Volume 27

Physics of precision experiments with Z's
F. JEGERLEHNER

Structure of nuclear matter and QCD sum rules
E. G. DRUKAREV and E. M. LEVIN

Color screening and color transparency in hard nuclear processes
L. FRANKFURT and M. STRIKMAN

The Nambu and Jona-Lasinio model: Its implications for hadrons and nuclei
U. VOGL and W. WEISE

Exotic mesons within the M.I.T. bag model
P. ZIMAK and R. D. VIOLLIER

Volume 26

Beyond the standard model
R. N. MOHAPATRA

Gauge theories and the physics of neutrino mass
J. W. F. VALLE

Particle physics with cold neutrons
D. DUBBERS

Strangeness in nuclear matter under extreme conditions
P. KOCH

Volume 25

Soliton models for nuclear physics
M. C. BIRSE

CP violation and the flavour structure of weak interactions
K. KLEINKNECHT

Weak non-mesonic decays of Λ-hypernuclei
J. COHEN

Many-body theory of high energy heavy ion reactions
W. CASSING and U. MOSEL

Iospin and F-spin in the interacting boson model
J. P. ELLIOTT

Volume 24

Electron scattering and few-nucleon systems
B. FROIS

Occupation probabilities of shell-model orbitals
G. J. WAGNER

Photoexitation of low-lying, isovector 1^+ states in deformed nuclei
U. KNEISSL

Nuclear response in an extended RPA formalism; an application to ^{48}Ca
M. G. E. BRAND, K. ALLAART and W. H. DICKHOFF

Recent advances in the spin–isospin nuclear responses
A. De PACE and A. MOLINARI

Algebraic description of intrinsic modes in nuclei
A. LEVIATAN

Observation of nuclear giant resonances in photon scattering and photon absorption experiments
B. ZIEGLER

Electron scattering with polarized beams and ^3He-targets
E. W. OTTEN

Polarized gamma-ray beams by inverse Compton scattering
D. BABUSCI, L. CASANO, A. D'ANGELO, P. PICOZZA, C. SCHAERF and B. GIROLAMI

The response function of nuclear matter
I. SICK

Electron scattering from the three-nucleon bound states
P. U. SAUER

Hard pion exchange currents and the backward deuteron disintegration
E. TRUHLIK and J. ADAM, Jr.

Parity-violating electron scattering
T. W. DONNELLY

The Mainz microtron facility MAMI
TH. WALCHER

Are nuclei strongly correlated Fermi liquids? Empirical evidence from (e,e'p) spectral functions
P. K. A. DE WITT HUBERTS

The Continuous Electron Beam Accelerator Facility: Project status and physics outlook
H. A. GRUNDER

Neutral pion production at threshold and low-energy theorems
R. DAHM and S. SCHERER

An introduction to nucleon resonances
M. M. GIANNINI

The nucleon as a projected chiral soliton: Vacuum and medium properties
M. FIOLHAIS, E. RUIZ ARRIOLA, P. ALBERTO and CHR. V. CHRISTOV

The study of baryon resonances by real photons
G. ANTON

Baryon–baryon interaction in the quark model and the H-dibaryon
A. FAESSLER and U. STRAUB

The one-gluon exchange current and the electromagnetic properties of the deuteron
A. BUCHMANN, Y. YAMAUCHI and A. FAESSLER

Quark versus mesons in nuclear force and nuclear currents
K. YAZAKI

The internal spin structure of the nucleon
K. RITH
